DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claims 1-5, drawn to tree pusher, classified in class 144, subclass 34.2.
- Group II. Claims 6-7, drawn to subcombinational detachable head for a tree pusher, classified in class 144, subclass 34.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidence by claim 1. The subcombination has separate utility such as use with any tree pusher and does not rely on the particulars of the invention of Group I for its operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
